THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Concrete bunkers are situated two or three kilometers from Baja, Hungary, and run parallel to the Yugoslav border. These bunkers are of three sizes: for 7, 15, and 30 men. They were constructed between 1952 and 1954 and are from one to three kilometers apart. The bunkers' connecting trenches run into a common zig-zag communications trench which is 1.30 meters deep and 1.1 meters wide. The walls of the trenches are covered with reeds. 25X1
2. Machine-gun emplacements have been built into the connecting trenches, approximately one kilometer apart. These emplacements have one to three firing-ports, depending on the terrain, and have a concrete cover. In front of the communications trench runs a double barbed-wire entanglement, 1.5 meters high and 1.2 meters wide.
3. The upkeep of the defense installations has been entrusted to an infantry unit from Baja Vaskut. It is believed that several defense lines, one to three kilometers apart, reach to the Yugoslav border. Between these lines are trenches, 0.50 to 0.60 meters deep, which are intended for deception; they are provided with dummy machine-gun positions.
4. Gun emplacements were installed behind the connecting trenches during 1952-1953 and again during May 1954. The guns have been placed in a circular firing position which is about 30 centimeters deep. The firing position leads to a dugout for the gun; this dugout is covered by a 30-cm. concrete roof. At each side of the gun dugout are three rooms housing the crew.
5. The emplacements are not occupied at the present time, and no exercises are being held. Attached is a sketch of the fortifications.
